

# Speed Harra

*The Dowdeswell Speed Harra is a spring tined cultivator available fully mounted for fast seedbed preparation in medium to light soils, with low HP requirements suiting tractors in the 80 - 140hp range.*

- The Speed Harra runs on front and rear crumble rollers which ensure a constant working depth.
- Spring tine harrows set at 10 per metre, run between the rollers and are easily adjusted for depth on a parallel linkage.
- Adjustable levelling boards are mounted in front of the leading roller to knock off high spots.
- The floating headstock ensures easy following of the tractor and the hydraulic folding frame (on 4 and 5 meter machines) brings the transport width down to 2.1 metres.
- The Speed Harra comes in 3, 4 and 5 meter working widths.

# Speed Harra

Machine Weights	
MACHINE WIDTH	MOUNTED
3 metre rigid	910 kg
4 metre folding	1280 kg
5 metre folding	1600 kg
